M.V. MINISUCH (100/TH SCALE) READING PLANS

ASSIGNMENT 1 -

Determine these measures of M.V. Minisuch using the plan.

Measured length = Length on waterline = Beam amidships = Max. draft = Freeboard = Min. angle of potential inflooding = Breaking strain of the cargo gear =

ASSIGNMENT 2 -

With reference to the plan, describe or simulate how to:

- a. Secure for heavy weather & pooping from a following sea.
- b. Trim to limit inflooding to aft compartment.
- c. Control collision damage inflooding to Port Forepeak at waterline.
- d. Implement a progressive loading plan while maintaining trim.
